National Foundation
for Transplants

Meeting a growing need

Every year, more than 4,000 people reach out for help to cover the high cost of transplant-related expenses. Since 1983, NFT has worked with transplant centers and patients to help save lives by removing the financial barriers to transplant operations. With a growing need for support, services provided by NFT will expand every year.

Our focus

Providing fundraising expertise and advocacy for patients and their families

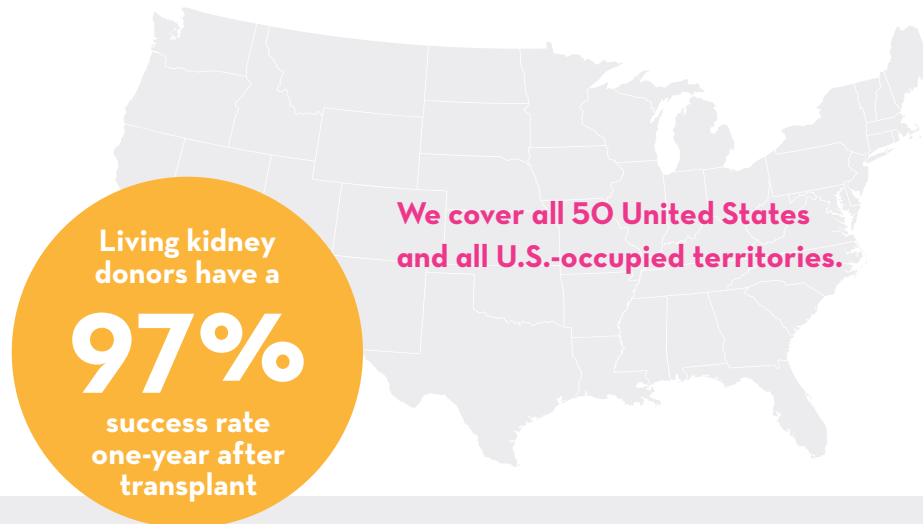

Being a program resource for medical professionals

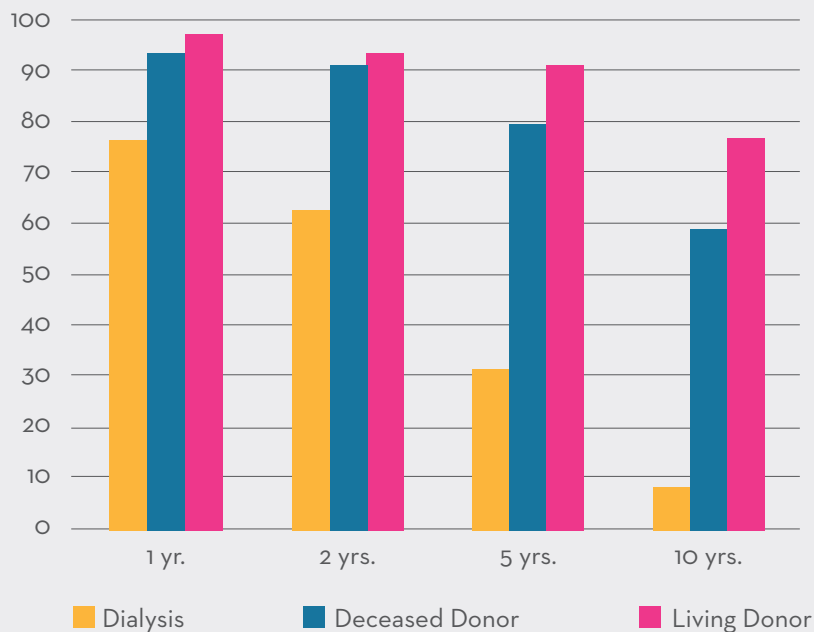

Promoting organ and tissue donation

Supporting innovative solutions and lifesaving treatments

Transplants from living donors dramatically increase patients' odds for success.
