

NFT and Walgreens Arrangement Benefits Eligible Patients

Walgreens transplant-specialized pharmacies work with the National Foundation for Transplants (NFT) to provide convenient services to patients assisted by NFT. The pharmacy network currently consists of more than 75 Walgreens pharmacies and features specially trained

pharmacists with an in-depth understanding of the transplant process, including management of complicated medications and their potential side effects. Walgreens provides expert guidance and personalized, ongoing support to patients facing the lifelong challenge of staying healthy.

Specialty Pharmacy

Walgreens Transplant-Specialized Pharmacy

The following are among the many supportive services Walgreens transplant-specialized pharmacies provide to patients and their families:

Help in easing the coverage paperwork and process by:

- Billing NFT directly for NFT-authorized financial assistance for eligible patients' transplant medications; patients remain responsible for amounts not funded by their insurance or NFT
- Coordinating transplant-related medication paperwork and verification of insurance coverage
- Providing free shipment of medications

Medication support through:

- One-on-one counseling to explain the complexities of the patient's medication regimen
- Monthly follow-up calls, starting the first day after discharge, to assess how the patient is doing, provide support and advice, and remind the patient or caregiver to refill prescriptions before they run out
- Collaboration with the patient's doctors and other caregivers to enable seamless, quality care

**For more information, contact NFT at 800-489-3863
or Walgreens Specialty Pharmacy at
transplant@Walgreens.com.**

NFT provides transplant-related financial assistance to eligible patients, regardless of their choice of provider.

Certain restrictions may apply for NFT financial assistance, which are determined solely by NFT.

Walgreens coordinates with many other assistance programs for transplant patients.
